Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Sequence 12, Application US/08319866
Patent No. 592923
GENERAL INFORMATION:
APPLICANT: Tully, Timothy P.
APPLICANT: Yin, Jerry C.
APPLICANT: Yin, Jerry C.
TITLE OF INVENTION: CLONING AND CHARACTERIZATION OF GENES
TITLE OF INVENTION: ASSOCIATED WITH LONG-TERM MEMORY
NUMBER OF SEQUENCES: 24
CORRESPONDENCE ADDRESS:
ADDRESSEE: Hamilton, Brook, Smith & Reynolds, P.C.
STREET: Two Militia Drive
CITY: Lexington
STRATE: Massachusetts
COUNTRY: USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  100.0%; Score 29; DB 1; Length 1144; 100.0%; Pred. No. 1.9e+02;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    0; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             COMPUTER NEADABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OORPRATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/319,866
FILING DATE: 7-0CT-1994
CLASSIFICATION: 514
PRIOR APPLICATION DATA:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 6921.

Sequence 6921. Application US/09513999C

Patent No. 678361.

GENERAL INFORMATION:

APPLICANT: Dumas Milne Edwards, J.B.

APPLICANT: Duclart, A.

APPLICANT: Glordano, J.Y.

TITLE OF INVENTION: Expressed Sequence Tags and Encoded Human Proteins.

Patent No. 6783961.

PATENTE OF INVENTION: Expressed Sequence Tags and Encoded Human Proteins.

CURRENT APPLICATION NUMBER: US/09/513,999C

CURRENT FILING DATE: 1999-02-24

PRIOR FILING DATE: 1999-02-26

NUMBER OF SEQ ID NOS: 36681.

Sequence 2, Application US/09123624

Fatent No. 6149936

GENERAL INFORMATION:

APPLICANT: SCHRADER, Jurgen

APPLICANT: GONGER, Axel

APPLICANT: TITLE OF INVENTION: TREATMENT OF VASCULAR DISORDERS

FILLE REFRENCE: 511169-2004

CURRENT APPLICATION NUMBER: US/09/123,624

CURRENT APPLICATION NUMBER: 08/553,503
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  APPLICANT: SCHRADER, Juergen

| Sequence 1, Application US/09747408
| Sequence 1, Application US/09747408
| Patent No. 6670399
| GENERAL INFORMATION:
| APPLICANT: Green, Allan M. |
| APPLICANT: Green, Remain Francine |
| TITLE OF INVENTION: Compounds And Methods For Modulating |
| TITLE OF INVENTION: Cerebral Amyloid Anglopathy |
| FILE REFERENCE: NBI-088 |
| CURRENT APPLICATION NUMBER: US/09/747,408 |
| CURRENT APPLICATION NUMBER: 60/171,877 |
| PRIOR PILING DATE: 1999-12-23 |
| NUMBER OF SEQ ID NOS: 24 |
| SOFTWARE: FastSEQ for Windows Version 4.0 |

                Sequence 5, Application 05/001/2010

Patent No. 6319498
GENERAL INFORMATION:
APPLICANT: Findeis, Mark A. et al.
TITLE OF INVENTION: Modulators of Amyloid Aggregation
NUMBER OF SEQUENCES: 45
CORRESPONDENCE ADDRESS:
CORRESPONDENCE ADDRESS:
CORPUTE: Massachusetts
COUNTRY: USA
ZIP: 02109-1875
CONFUTER: EDSTON
STATE: MASSACHUSETTS
COMPUTER: EDSTON
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC Compartible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: PAPLICATION DATA:
APPLICATION NUMBER: US/08/617,267C
FILING DATE: 14-MAR-1996
PRIOR APPLICATION DATA:
APPLICATION NUMBER: USSN 08/475,579
FILING DATE: 14-MAR-1995

Sequence 64, Application US/08766596A

Patent No. 6462171

GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: SOTO-JARA, Claudio
APPLICANT: BAUMANN, Marc
APPLICANT: FRANGIONE, Blas
TITLE OF INVENTION: PEPTIDES AND PHARMACEUTICAL
TITLE OF INVENTION: ASSOCIATED WITH PROTEIN FOLDING INTO AMYLOID OR AMYLOID-LIKE
TITLE OF INVENTION: DEPOSITS
NUMBER OF SEQUENCES: 69
CORRESPONDENCE ADDRESS:
ADDRESSEE: BROWDY AND NEIMARK
                                                                                                                                                                                      PEPTIDES AND PHARMACEUTICAL COMPOSITIONS
THEREOF FOR TREATMENT OF DISORDERS OR DISEASES ASSOCIATED
WITH PROTEIN FOLDING INTO AMYLOID OR AMYLOID-LIKE DEPOSITS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Gaps

Patent No. 6743427

GENERAL INFORMATION:

APPLICANT: Schenk, Dale B.

APPLICANT: Bard, Frederique

APPLICANT: Vagnez, Nicki

APPLICANT: Vagnez, Nicki

APPLICANT: Vagnez, Ted

TITLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease

FILE REPERENCE: 152702-004750UC

CURRENT APPLICATION NUMBER: US/09/724,961

FRICH APPLICATION NUMBER: US 09/580,015

PRIOR FILING DATE: 2000-05-26

PRIOR FILING DATE: 1999-05-28

FRICH APPLICATION NUMBER: US 09/322,289

FRICH APPLICATION NUMBER: US 09/201,430

PRIOR FILING DATE: 1999-11-30

PRIOR PLING DATE: 1999-11-30

PRIOR FILING DATE: 1999-11-30

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 20, Application US/09580018
Patent No. 6761888
PAPLICANT: Schenk, Dale B.
APPLICANT: Bard, Frederique
APPLICANT: Yednock, Tederique
APPLICANT: Yednock, Tederique
TITLE OF INVENTION: Prevention and Treatment of Amyloidogenic Disease
                                                                                                                                                                                                                Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  FEATURE:
CTHER INFORMATION: Description of Artificial Sequence:10-mer peptide
CTHER INFORMATION: from AN1792 sequence (human Abeta42, beta-amyloid
CTHER INFORMATION: peptide)
US-09-724-961-24
TYPE: PRT

ORGANISM: Artificial Sequence

FEATURE:
OTHER INFORMATION: Description of Artificial Sequence:10-mer peptide
OTHER INFORMATION: from AN1792 sequence (human Abeta42, beta-amyloid
US-09-724-961-23
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     ö
                                                                                                                                                                                                                ô
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Score 26; DB 4; Length 10;

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 12, Application US/09388890

Sequence 12, Application US/09388890

GENERAL INFORMATION:

APPLICANT: ANDERSON, STEPHEN

TITLE OF INVENTION: METHODS FOR THE PREVENTION AND TREATMENT

TITLE OF INVENTION: OF VASCULAR HEMORRHAGING AND ALZHEIMER'S DISEASE

NUMBER OF SEQUENCES: 14

CORRESPONDENCE ADDRESS:

ADDRESSEE: HOWREY & SIMON
               Sequence 19, Application US/09747408

Patent No. 6670399
GENERAL INFORMATION:
APPLICANT: Green, Allan M.
APPLICANT: Gervais, Francine
TITLE OF INVENTION: Compounds And Methods For Modulating
TITLE OF INVENTION: Cerebral Amyloid Angiopathy
FILE REFERENCE: NBI-088
CURRENT APPLICATION NUMBER: US/09/747,408
CURRENT FILING DATE: 2000-12-22
FRIOR APPLICATION NUMBER: 60/171,877
FRIOR FILING DATE: 1999-12-23

ö Sequence 12, Application US/09660954
Sequence 12, Application US/09660954
Patent No. 6471960
GENERAL INFORMATION:
GENERAL INFORMATION: ANDERSON, STEPHEN
TITLE OF INVENTION: METHODS FOR THE PREVENTION AND TREATMENT
OF VASCULAR HEMORRHAGING AND ALZHEIMER'S DISEASE Gaps Gaps . 0 ; 0 COMPUTER: IEM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Batentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/660,954
FILING DATE: 13-Sep-2000
CLASSIFICATION: -Unknown>
PRIOR APPLICATION OF THE COMPANSER: US/09/388,890
FILING DATE: -Unknown>
APPLICATION NUMBER: US/09/388,890
FILING DATE: -UNknown>
ATTORNEY/AGENT INFORMATION:
NAME: AUBREBACH, JEFREY I.
REGISTRATION NUMBER: 32,680
TELECOMMUNICATION INFORMATION: 100.0%; Score 34; DB 3; Length 28; 100.0%; Pred. No. 0.44; ive 0; Mismatches 0; Indels Query Match
100.0%; Score 34; DB 4; Length 28;
Best Local Similarity 100.0%; Pred. No. 0.44;
Matches 7; Conservative 0; Mismatches 0; Indels CLONE: E220 B(1-28) peptide of amyloid B protein SEQUENCE DESCRIPTION: SEQ ID NO: 12: FRAGMENT TYPE: N-terminal ORLGINAL SOURCE: ORGANISM: HOMO SAPIENS INMEDIATE SOURCE: CLONE: E22Q B(1-28) peptide of amyloid B protein NUMBER OF SEQUENCES: 14
CORRESPONDENCE ADDRESS:
ADDRESSEE: HOWREY & SIMON
STREET: 1299 PENNSYLVANIA AVENUE, N.W. TELEPHONE: (202) 383-7451 TELEFAX: (202) 383-6610 ZIP: 20004 COMPUTER READABLE FORM: MEDIUM TYPE: Floppy disk

GENERAL INFORMATION:
APPLICANT: Jacobsen, J. S.
APPLICANT: Vicek, M. P.
APPLICANT: Vicek, M. No. 5652092el Amyloid Precursor and Method of
TITLE OF INVENTION: Using Same to Access Agents Which Down-Regulate Formation
TITLE OF INVENTION: OF B-Amyloid Peptide
NUMBER OF SEQUENCES: 19
CORRESPONDENCE ADDRESS:
ADDRESSE: American Cyanamid Company
STREET: One Cyanamid Plaza
CITY: Wayne
                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Patent No. 6582945

GENERAL INFORMATION:
Patent No. 6582945

GENERAL INFORMATION:
APPLICANT RABO, VICTOR
TITLE OF INVENTION: IMMUNOLOGICAL CONTROL OF BETA-AMYLOID LEVELS IN VIVO
FILE REPERENCE: BERI-2004
CURRENT PILING DATE: 2000-06-15
PRIOR APPLICATION NUMBER: 60/139,408
PRIOR PILING DATE: 1999-06-16
NUMBER OF SEQ ID NOS: 7
SEQ ID NO 5
LENGTH: 14
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps

Sequence 63, Application US/08766596A

Patent No. 6462171

APPLICANT: SOTO-JARA, Claudio

APPLICANT: BAUMANN, Marc

APPLICANT: BAUMANN, Marc

APPLICANT: COMPOSITIONS THEREOF FOR TREATMENT OF DISORDERS OR DISEASES

TITLE OF INVENTION: ASSOCIATED WITH PROTEIN FOLDING INTO AMYLOID OR AMYLOID-LIKE

TITLE OF INVENTION: DEPOSITS

NUMBER OF SEQUENCES: 69

CORRESPONDENCE ADDRESS:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 7, Application US/08302808

Sequence 7, Application US/08302808

Patent No. 575049

GENERAL INFORMATION:
APPLICANT: SUZUKI, No. 5750349uhiro
APPLICANT: SUZUKI, No. 5750349uhiro
APPLICANT: KITADA, Chieko
TITLE OF INVENTION: ANTIBODIES TO B-AMYLOIDS OR THEIR
TITLE OF INVENTION: DERIVATIVES AND USE THEREOF
NUMBER OF SEQUENCES: 14

CORRESPONDENCE ADDRESS: 14

ADDRESSEE: DIKE, BRONSTEIN, ROBERTS & CUSHWAN
STREET: 130 WATER STREET

CITY: BOSTON
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  100.0%; Score 50; DB 1; Length 28; 100.0%; Pred.
